## CAMP COOKING CHECKLIST

We don't have to tell you that not all camping trips are created equal. A night at the local campground is much different from a week spent roaming national parks, so it's important to pack for camping accordingly lest you find yourself hauling around too much or lamenting that you brought too little. That being said, you should always be prepared for every contingency that comes with outdoor adventuring. This checklist for camp cooking leaves no stone unturned and no trail unexplored, tackling everything from camping cookware and camp grills to cleanup necessities and food storage. We were as comprehensive as possible, so feel free to pull from this list and adjust as necessary based on your preferred camp kitchen setup.

### Cooking Equipment

- Camp grill
- Grill fuel
- Outdoor cooking table

### Camping Cookware

- Skillets, pots, and pans with lids
- Griddle
- Grill basket
