

5 Tips For Setting Up Your Blaze BBQ Island

1. Your island will be delivered via standard curbside delivery. Have a couple of strong people on hand to transport the island and equipment to your patio.
2. Adjust the island feet to ensure your island is level.
3. Your grill and power burner are not intended to be bolted in place. Simply slide them in place.
4. Should you ever intend to move your island, remove the grill and power burner before doing so.
5. The doors and drawers can be mounted with a variety of hardware options. The most common is to drill pilot holes in the island frame and secure equipment with metal self-tapping screws.
