DESIGN CHOICES

GRILLS

- 1 BE1-48RCI Grill**

48" Grilling surface, infrared sear burner, left or right hand rotisserie placement, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 2 BE1-36RCI Grill**

36" Grilling surface, infrared sear burner, left or right hand rotisserie placement, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 3 BE1-48RC Grill**

48" Grilling surface, left or right hand rotisserie placement, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 4 BE1-36RC Grill**

36" Grilling surface, left or right hand rotisserie placement, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 5 BE1-48C Grill**

48" Grilling surface, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 6 BE1-36C Grill**

36" Grilling surface, charcoal smoker tray, full surface searing, secondary cooking. Gas options: LP or NG
- 7 BGA54-IJS INSULATION JACKET**

54" Jacket for combustible cabinet installation (ASE6-48 6" storage in combination with S9 48" grill)
- 8 BGA48-IJS INSULATION JACKET**
- 9 BGA42-IJS INSULATION JACKET**
- 10 BGA36-IJS INSULATION JACKET**
- 11 ASE6-48 SIDE STORAGE**
- 12 ASE6-36 SIDE STORAGE**

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. SPECIALTY COOKING

1 SBE1-142 Double Side Burner

14" Double side burner with cover. Gas Options: LP or NG

2 PBE1-24 Power Burner

24" Power burner with cover. Gas Options: LP or NG

3 GDSBE1-302 Griddle/Side Burner

30" Griddle/side burner with cover. CAD1-30E Free-standing cart install option available.

Gas Options: LP or NG

4 BE1-30AG All Grill

30" Grilling Surface with cover. CAD1-30E Free-standing cart install option available.

Gas Options: LP or NG

5 GDE1-30 Griddle

30" Large griddle with separate temperature zones. CAD1-30E Free-standing cart install option available.

Gas Options: LP or NG

6 BGB30-IJS 30" Insulation Jacket

30" Jacket for combustible cabinet installation with GDSBE1-302 Griddle/Side Burner, BE1-30AG All Grill and GDE1-30 Griddle

7 BGA24-IJS 24" Insulation Jacket

24" Jacket for combustible cabinet installation with PBE1-24 Power Burner

CHILLERS IN COUNTER

- 1 BC25 Sink**
25" Bottle and ice sink with four condiment storage containers.
- 2 BC1-25AC Bottle Holder Sink Accessory**
25" 1 litre bottle holder with towel rack.
- 3 RF24BTR2, RF24BTL2 Outdoor Beer Dispenser**
24" Dual tap, CO2 tank and regulator, refrigerated keg storage, door open alarm, digital temperature control with in counter drainage system. Left or right door opening.

- 4 RF24BTR2, RF24BTL2 Outdoor Beer Dispenser**
24" Single tap, CO2 tank and regulator, refrigerated keg storage, door open alarm, digital temperature control with in counter drainage system. Left or right door opening

CHILLERS UNDER COUNTER

- 5 RF24DE4 Outdoor refrigerator drawers**
24" Refrigerated drawers, 5 cu foot capacity, rapid cool down, and open door alarm.
- 6 RF24RE4, RF24LE4 Outdoor refrigerator**
24" Single door refrigerator, 5.3 cu foot capacity and open door alarm. Left or right door opening.
- 7 RF15IL3, RF15R3 Outdoor Ice Machine**
15" Ice Machine, 39lb per day, sound buffered, eco and delay mode.

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. Specific installation guidance will be available on our website [dcsappliances.com](https://www.dcsappliances.com)

DRAWERS

- 1 WD1-30-SSOD Warming drawer**
30" Outdoor warming drawer, removable stainless steel shelf, space for 6 standard dinner plates.
- 2 TDT1-20 Tower drawer triple**
20 5/16" Wide outdoor weather resistant triple drawers.
- 3 TDD1-20 Tower drawer double**
20 5/16" Wide outdoor weather resistant double drawers.
- 4 TDS1-20 Tower drawer single**
20 5/16" Wide outdoor weather resistant single drawer.
- 5 TB1-20 Trash bin**
20 5/16" Wide waste solution with two full sized removable bins.
- 6 ADR2-48 Access drawers**
48" Wide access four drawer or convert to trash drawer and flexible storage.
- 7 ADR2-36 Access drawers**
36" Wide access three drawer or convert to trash drawer and flexible storage.
- 8 ADR2-30 Access drawers**
30" Wide access two drawer or convert to trash drawer and flexible storage.
- 9 ADR2-24 Access drawers**
24" Wide access single drawer or convert to trash drawer.

The models shown in this Planning Guide may not be available in all markets and are subject to change at any time. Product specifications may vary from those shown. This Planning Guide should not be used as installation guidance for any product. Further information is required to safely and correctly install the products featured here. DATA SHEETS

Model no:
48" Grills with rotisserie - BE1-48RCI, BE1-48RC

Product Dimensions	inch	mm
A Overall height	27 3/8	696
B Overall width including rotisserie motor	53 1/4	1353
C Overall depth	27 15/16	709
D Height of chassis including flange	10 1/2	267
E Height of chassis from top of hood to flange	16 15/16	430
F Height of chassis below flange	9 15/16	253
G Width of control panel	47 15/16	1217
H Width of chassis inside enclosure	45 9/16	1158
I Rotisserie motor depth	5 5/16	135
J Control panel depth	22 3/16	55
K Front of cabinet (proud) to rear flange	23 5/16	592
L Depth of rear flange	1	25
M Width of side flanges	1 3/16	29.5
N Front of chassis to gas outlet	20 1/16	509
O Height of open hood to top of counter-top	27 3/8	691

Minimum Clearances	inch	mm
P Clearance to combustible construction	18	457
Q Clearance to protected combustible construction	12	305
R Clearance to non-combustible construction	3	76
S Minimum clearance top of open hood to non-combustible surface	24	76

Note: Do not install under unprotected combustible or protected combustible construction without using a fire safe ventilation system As per UL 507 and CSA C22.2 No 60335-2-31.

If the grill is to be placed into a combustible enclosure, an approved insulated jacket is necessary. Use only the DCS insulated jacket which has specifically been designed and tested for this purpose.

48" Insulated jacket model number: BGA48-IJS

PLANNING CONSIDERATIONS

Model no:
Grills - BE1-48RCI, BE1-48RC, BE1-48C BE1-36RCI, BE1-36RC, BE1-36C

Product Dimensions		
Clearance to non-combustible* surfaces		
	inch	mm
(A) Minimum clearance to sides	6	153
(B) Minimum clearance to back	3	76
(C) Minimum clearance top of open hood to surface	24	610

Clearance to combustible** surfaces		
	inch	mm
(A) Minimum clearance to sides	18	457
(B) Minimum clearance to back	18	457

Clearance to protected*** combustible surfaces		
	inch	mm
(A) Minimum clearance to sides	12	305
(B) Minimum clearance to back	12	305

*Non-combustible materials are materials that are not capable of being ignited and burned consisting entirely of steel, iron, brick tile, concrete, slate and plaster.

**Combustible materials include any decorative or structural material made of wood, compressed paper, plant fibres, vinyl, plastic or other materials that are capable of transferring heat or being ignited or burned. Such materials are considered combustible even if flame proofed, fire retardant treated, surface painted or plastered. Clearances from combustible materials of minimum 18" (457mm) apply to the internal carcass of the cabinet if an insulation jacket is not used.

***Protected combustible surfaces have a non-combustible material (minimum 4" or 102mm) in front of or covering combustible material.

Note: Do not install under unprotected combustible or protected combustible construction without using a fire safe ventilation system As per UL 507 and CSA C22.2 No 60335-2-31.

If the grill is to be placed into a combustible enclosure, an approved insulated jacket is necessary. Use only the DCS insulated jacket which has specifically been designed and tested for this purpose.

Wind hitting the grill while in use, (especially wind blowing into or across the hood gap) can cause poor performance. In some cases wind can cause the control panel to get hot. If wind is an issue, a windscreen should be added.

Wind protection Dimensions		
	inch	mm
Ⓐ Minimum windscreen height	18 3/4	476
Clearance to combustible surfaces		
Ⓑ Minimum clearance to back	18	457
Clearance to non-combustible surfaces		
Ⓑ Minimum clearance to back	3	76

Note: Wind hitting the grill while in use, (especially wind blowing into or across the hood gap) can cause poor performance and in some cases can cause the control panel to get dangerously hot. If wind is an issue, a windscreen should be added.

SPECIFICATIONS | VENTILATION REQUIREMENTS FOR LP CYLINDER ENCLOSURES

SECTION VIEW
MULTIPLE TANKS

SIDE VIEW

SECTION SINGLE
TANK

LP cylinder storage *ventilation requirements:

Ventilation Dimensions

(A) Upper ventilation min free area** (1"² per lb)	20"²(20lb cylinder)	129cm²
B Upper ventilation openings must be installed within 5" (127mm) of the top of the enclosure and unobstructed.	5"	127mm
(C) Lower ventilation min free area** (1/2"²per lb)	10"² (20lb cylinder)	64.5cm²
D Lower ventilation openings must be installed within 5" (127mm) of the bottom of the enclosure and unobstructed.	5"	127mm

*Refer to ANSI Z21.58 Standard for Outdoor Cooking Gas Appliances, Section 4.6.2 Enclosures For Self Contained LP-Gas Supply Systems. Both upper and lower ventilation openings are required.

**Free area is the area within an opening unobstructed by grills or dampers when in operation. Every opening must be wide enough to fit an 3/16" (4.8mm) rod.

Note: At least one ventilation opening shall be provided on the exposed exterior side of the enclosure located within 5" (127mm) of the top of the enclosure and unobstructed. The opening(s) shall have a total free area of not less than 1"²/lb (14.2cm² /kg) of stored fuel capacity.

At least one ventilation opening shall be provided on the exposed exterior side of the enclosure 1" (25.4mm) or less from the floor level and shall have a total free area of not less than 1/2"² /lb (7.1cm²/kg) of stored fuel capacity. The upper edge shall be no more than 5" (127mm) above the floor level.

Every opening shall have a minimum dimension so as to permit the entrance of a 3/16" (4.8mm) rod.

Do not install under unprotected combustible or protected combustible construction without using a fire safe ventilation system As per UL 507 and CSA C22.2 No 60335-2-31.
