

Patio Comfort

Infrared Outdoor Patio Heaters

Patio Comfort outdoor infrared patio heaters are designed and crafted to bring warmth, comfort, and enjoyment to your "alfresco" dining and entertainment events. The clean, efficient, and draft free infrared radiant heat feels just like the sun, warming people and objects, while not wasting valuable energy trying to heat air.

Our outdoor heaters are designed to extend the use of your patio, deck, or dining area well into the chilly fall months and will allow the use of your outdoor entertainment and dining areas virtually year-round. The *Patio Comfort* heater uses a standard five-gallon propane cylinder (not included) with approved over-fill protection device (OPD).

All *Patio Comfort* heaters are easy to move with our standard portable wheel kits. Our heaters are designed with long-term durability and performance in mind. Our painted heaters are "powder coated" for added durability and most major components and fasteners used in our stainless steel heaters are made from commercial grade "Series 304" stainless steel or brass.

Product Features and Benefits:

- Completely Self Contained & Portable
- Provides Clean Draft-Free Circle of Warmth
Please Note: Actual heating area and coverage will depend on wind conditions, protection of area, and other variables. Generally a 10-12 foot circle of warmth will be created by our heaters in ideal conditions.
- Convenient Piezoelectric "Matchless" Ignition System
- 100% Safety Control
- Weather Resistant Construction
- Adjustable Heat Output
- Easy To Move Wheel Kit Included
- Requires Five Gallon "OPD" Auto Over Fill Safety Cylinder (not included)
- Underwriters Laboratories (UL) Approved

Model PC-02-S (Stainless Steel)
