

SmartGrill by Lynx™

Quick Start Power Connectivity and Wi-Fi Set Up Process

Step #1—Requirements

- 👉 Smart Device (Phone or Tablet)
 - 👉 110 volt GFCI outlet at the grill
 - 👉 Proper gas supply
 - 👉 Home Network name (SSID) and password: _____/_____
 - 👉 SmartGrill by Lynx™ Serial Number/PIN*: _____/_____
- * Located on the last page of your manual or on the computer box

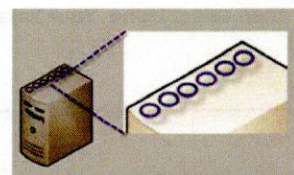

iPhone 5 or greater or iPad version 2.0 or greater

Android 4.4 or greater

Step #2—Setup your SmartGrill

- 👉 If not already done, locate the 6 wire connections inside the grill and attach them to the SmartGrill computer case. Each cable is labeled to coincide with the port on the SmartGrill computer. Please be sure to connect the cables as per labeling on cable and computer.
- 👉 Plug in the power cable from the SmartGrill into a 110v GFCI electrical outlet.

Step #3—Download and setup the SmartGrill App on your Phone or Tablet and create your account

- 👉 Go to iTunes or Google Play and download “SmartGrill by Lynx” and install
- 👉 Open the SmartGrill App and click **Create Account** then enter your Grill Serial and PIN number then click **Continue**
- 👉 Enter your email address and password. Enter your registration information and click **Create Account**. You will get a confirmation email.

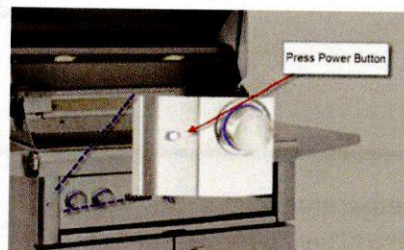

SmartGrill setup (continued)

Step #4—Setup WiFi connectivity

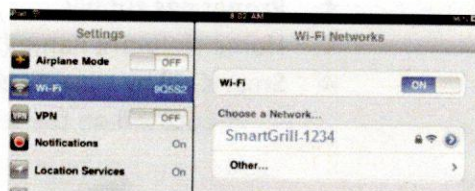

- On your Phone or Tablet, verify that you have at least 50% wireless signal at your SmartGrill.

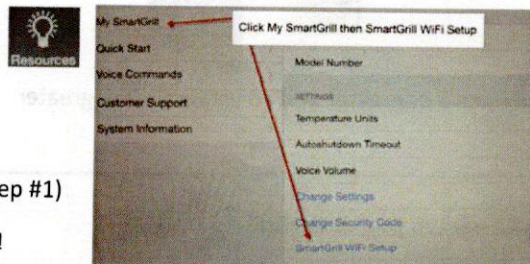

- On your SmartGrill, press the Power button and wait about 30 seconds for the SmartGrill to say "SmartGrill at Your Service"

- On your Phone or Tablet, switch to your Wi-Fi settings and locate the wireless network called **SmartGrill xxxx** (xxxx is the last four digits of your serial number) and connect to it. The password is **lynxgrill**

- Now go back to your SmartGrill App and go to the **Resources** icon then **My Smart Grill/SmartGrill WiFi Setup**

- Add the SSID and password for your home network (information in step #1) then select **Done**. Your SmartGrill is now connected and ready to grill!

Step #5—Start using your grill

- Turn your lights on by saying, "**SmartGrill lights**" this will turn the lights on. To turn the lights off say "**SmartGrill lights**" and the lights will now turn off.
- To try out a recipe, go back to your SmartGrill App and go to the **Grill** icon.
- Select a recipe from the Recipe list and click **Cook Now** to send the recipe to your SmartGrill and follow the voice commands (How many burners, place food on grill, turn food over, remove food from grill). Please note that it will take several minutes for your SmartGrill to warm up and give you the command to place food on grill.

Need more help? Please refer to your detailed instruction manual or call our customer support team at 888-289-5969 and choose the SmartGrill option # xxxx (Brenda...what is the option number?)
