

THERMAL IMAGING WEAPON SIGHT

ThOR-320 2X

ATN is proud to introduce the newest line of ThOR Thermal Weapon Scopes. The most advanced night vision technology available is brought to you by the premier company dedicated to providing night vision systems at affordable prices. The new ThOR line is rich with features and options making it the best value of any comparable system on the market. This model is lightweight and small enough to fit in the palm of your hand, yet it's rugged and durable.

The entire system is built in the USA, utilizing Mil-Spec Lenses that make the ThOR battle-worthy for most any mission, operation, or outdoor activity. Each system features a digital menu that gives you a variety of options and adjustments allowing you to customize your system. You can select a number of reticle options (5 standard) as well as choose a reticle color best suited for your specific application. No more black reticles on a black and white screen – ThOR features a color OLED display giving you a sharp color reticle every time. Or switch to full color mode (5 available) and overlay it with either a black, green or red reticle depending on the conditions and the environment.

Ever have problems with a scope not being able to hold zero? The ThOR has no screws or springs that can create targeting errors. With all digital controls, the ThOR will NEVER allow your reticle to move off base.

ThOR-320 feature a number of lens options as well as Fast or Enhanced Imaging capability. These scopes provide amazing image quality through total darkness, fog, or smoke. Darkness, camouflage or bright lights will not affect the sensitivity of these units. All units have feature E-Zoom to expand your optical magnification. They're Ideal for nighttime hunting, force protection, border patrol, police SWAT and special operations. And they feature a video-out connection and cable which will let you capture your nighttime operation on video.

These units are priced like no other thermal devices in their class – as much as half of what you would expect to pay! No other product is comparable in value or price. The ATN ThOR functions equally well as a weapon scope or a handheld viewer. Once you experience Digital Thermal you may not want to use anything else again!

- | **Magnification: 2x**
- | **Aircraft aluminum constructed body with class 3 hard anodized coating**
- | **Digital Tactical Menu with quick-view icons**
- | **Memory Recall preserves operational settings**
- | **Power-off safety feature prevents accidental shut down**
- | **Recoil rated up to .308 caliber**
- | **Polarity: white hot / black hot / color**
- | **12 selectable color pallets available to view thermal images.**
- | **Five reticle patterns: duplex, post, post with dot, open cross hair, standard crosshair**
- | **Five reticle colors: red, green, white, black, blue**
- | **Six-step brightness control**
