

MEDIO C24

Technical Specifications

Description

The Bella Medio C24 is an ultra-premium, mid-sized pizza oven cart. With all 304 stainless steel construction and an ample 24"W x 20"D cooking floor with 560 sq. in. cooking space, the Medio C24 delivers luxury, quality and cooking capacity. It is big enough to bake two pizzas at a time, hold multiple roasting pans, bake 9 loaves of bread and grill steaks and vegetables for larger groups.

With a modern, high-tech stainless steel cooking dome, the Medio C24 heats up in about 15 minutes, and bakes almost unlimited 2-3 minute Italian pizza – one after another. It can bake and roast better than a conventional oven, grill better than a charcoal or gas grill, and it has more capacity than a typical kettle grill, making the Medio C24 a great choice as your one outdoor cooking appliance. It's the one oven that can do it all.

The oven features all 304 stainless steel, solid weld construction for the oven dome, landing, door and chimney – plus the pizza oven cart, promising years of worry-free, rust-free operation. The Medio C24 cooking floor uses authentic ceramic firebrick baking stones for great cooking performance. These dense refractory tiles offer outstanding heat retention and heat transfer for traditional pizza and bread baking, as well as premium durability.

The Medio C24 oven cart features 304 stainless steel construction for the cart legs, wood storage tray and handles, and it provides two handles and four locking casters, making it easy to move and position the oven. For family and party size cooking, the Medio C24 a great choice.
